Disclaimer

This companion guide for the ANSI ASC X12N 835 transaction has been created for use in conjunction with the standard Implementation Guide It should not be considered a replacement for the Implementation Guide, but rather used as an additional source of information The companion guide contains data clarifications derived from specific business rules that apply exclusively to Medicaid processing for Washington State DSHS The guide also includes useful information about sending and receiving data to and from the ProviderOne system

Revision History

Documented revisions are maintained in this document through the use of the Revision History Table shown below all revisions made to this companion guide after the creation date are noted along with the date, page affected, and reason for the change

Revision Level	Date	Page	Description	Change Summary
WAMMIS-CG835-00-00-01	06/09/08		Initial Document	
WAMMIS-CG835-00-00-02	06/27/08		Comments from DSHS incorporated	
WAMMIS-CG-835-01-01	06/28/08		Final Delivery	
WAMMIS-CG-835-01-02	07/16/08		Re-Delivery of the Deliverable based on DSHS non-Acceptance and identification of deficiencies	
WAMMIS-CG-835-01-03	10/01/08		Re-Delivery of the Deliverable based on DSHS suggested changes to Trading Partners Testing Procedures verbiage	
WAMMIS-CG-835-01-04	04/21/09		Removal of “Payee Additional Identification” situational segment	

Contents

1 Introduction

The Administrative Simplification provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, Title II) includes requirements that national standards be established for electronic health care transactions, and national identifiers for providers, health plans, and employers. This requires Washington State Department of Social and Health Services (DSHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions between covered entities (health care providers, health plans, and healthcare clearinghouses.

The intent of these standards is to improve the efficiency and effectiveness of the nation's health care system by encouraging widespread use of electronic data interchange standards in health care. The intent of the law is that all electronic transactions for which standards are specified must be conducted according to the standards. These standards were not imposed arbitrarily but were developed by processes that included significant public and private sector input.

1.1 Document Purpose

Companion Guides are used to clarify the exchange of information on HIPAA transactions between the DSHS ProviderOne system and its trading partners. DSHS defines trading partners as covered entities that either submit or retrieve HIPAA batch transactions to and from ProviderOne.

This Companion Guide provides information about the 835 Health Care Payment/Advice that is specific to DSHS and DSHS trading partners. This Companion Guide is intended for trading partner use in conjunction with the ANSI ASC X12N National Implementation Guide listed below. The ANSI ASC X12N Implementation Guides can be accessed at http://www.wpc-edi.com.

- ASC X12N 835 (004010X091)
- ASC X12N 835 (004010X091A1) (Addenda)

1.1.1 Intended Users

Companion Guides are intended for members of the technical staffs of trading partners who are responsible for electronic transaction/file exchanges.

1.1.2 Relationship to HIPAA Implementation Guides

Companion Guides are intended to supplement the HIPAA Implementation Guides for each of the HIPAA transactions. Rules for format, content, and field values can be found in the Implementation Guides. This Companion Guide describes the technical interface environment with DSHS, including connectivity requirements and protocols, and electronic interchange

procedures. This guide also provides specific information on data elements and the values required for transactions sent to or received from DSHS.

Companion Guides are intended to supplement rather than replace the standard Implementation Guide for each transaction set. The information in these documents is not intended to:

- Modify the definition, data condition, or use of any data element or segment in the standard Implementation Guides.
- Add any additional data elements or segments to the defined data set.
- Utilize any code or data values that are not valid in the standard Implementation Guides.
- Change the meaning or intent of any implementation specifications in the standard Implementation Guides.

1.2 Transmission Schedule

N/A

2 Technical Infrastructure and Procedures

2.1 Technical Environment

2.1.1 Communication Requirements

This section will describe how trading partners will receive 835 Transactions from DSHS using 2 methods:

- Secure File Transfer Protocol (SFTP)
- ProviderOne Web Portal

2.1.2 Testing Process

Completion of the testing process must occur prior to production electronic retrieval from ProviderOne. Testing is conducted to ensure the following for maintaining HIPAA guidelines:

1. Syntactical integrity: Testing of the EDI file for valid segments, segment order, element attributes, testing for numeric values in numeric data elements, validation of X12 or NCPDP syntax, and compliance with X12 and NCPDP rules.
2. Syntactical requirements: Testing for HIPAA Implementation Guide-specific syntax requirements, such as limits on repeat counts, used and not used qualifiers, codes, elements and segments. It will also include testing for HIPAA required or intra-segment situational data elements, testing for non-medical code sets as laid out in the Implementation Guide, and values and codes noted in the Implementation Guide via an X12 code list or table.

Additional testing may be required in the future to verify any changes made to the ProviderOne system. Changes to the ANSI formats may also require additional testing. Assistance is available throughout the testing process.

Trading Partner Testing Procedures

1. ProviderOne companion guides and trading partner enrollment package are available for download via the web at http://maa.dshs.wa.gov/dshshipaa
2. The Trading Partner completes the Trading Partner Agreement and submits the signed agreement to DSHS.

   Submit to: Provider Enrollment

   PO Box 45562

   Olympia, WA 98504-5562

For Questions call 1-800-562-3022 option 2, then option 5

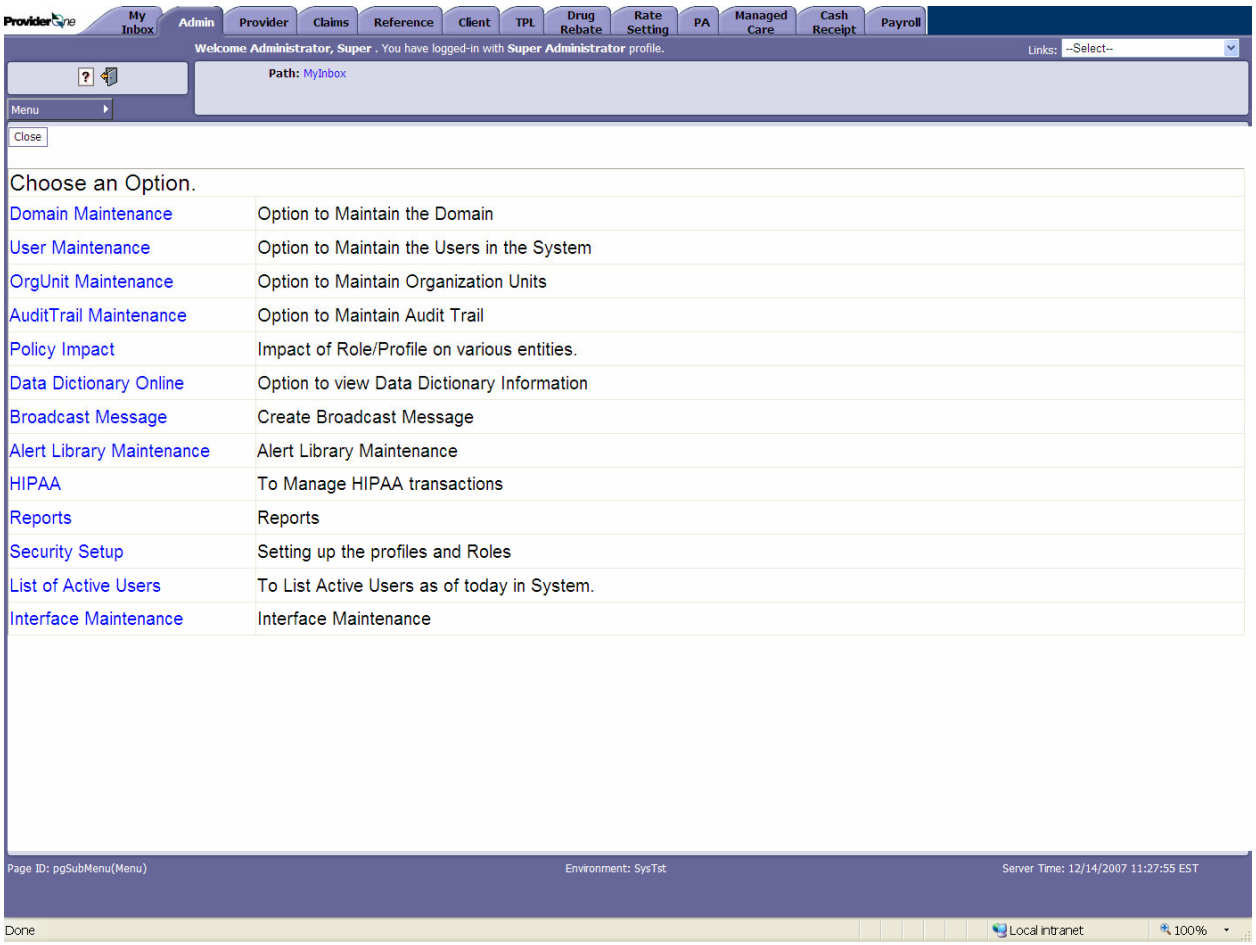
3. The trading partner is assigned a Submitter ID, Domain, Logon User ID and password.
4. ProviderOne system processes and validates all outbound HIPAA test files. It will be available for download via the ProviderOne web portal or Secure File Transfer Protocol (SFTP).
    - Web Portal URL: https://www.waproviderone.org/edi
    - SFTP URL: sftp://ftp.waproviderone.org/
5. The trading partner downloads the file from the ProviderOne web portal or Secure File Transfer Protocol (SFTP).
6. If the test file download is successful and the trading partner's system accepts the file for processing, the trading partner is approved for transaction download in the ProviderOne production environment.
7. If the test file download is unsuccessful, the trading partner should immediately call 1-800-562-3022 to report the failure. They will continue testing in the testing environment until a successful download is completed.

2.1.3 Who to contact for assistance

- Telephone Number: 1-800-562-3022
    - Select option 2
    - Select option 4
    - All calls result in the assignment of a Ticket Number for problem tracking
- Hours: 8:00 AM – 5:00 PM Pacific Standard Time, Monday through Friday
- Information required for initial call:
    - Topic of Call (setup, procedures, etc.)
    - Name of caller
    - Submitter ID Number
    - Organization of caller
    - Telephone number of caller
    - Nature of problem (connection, receipt status, etc.)
- Information required for follow up call(s):
    - Assigned Ticket Number

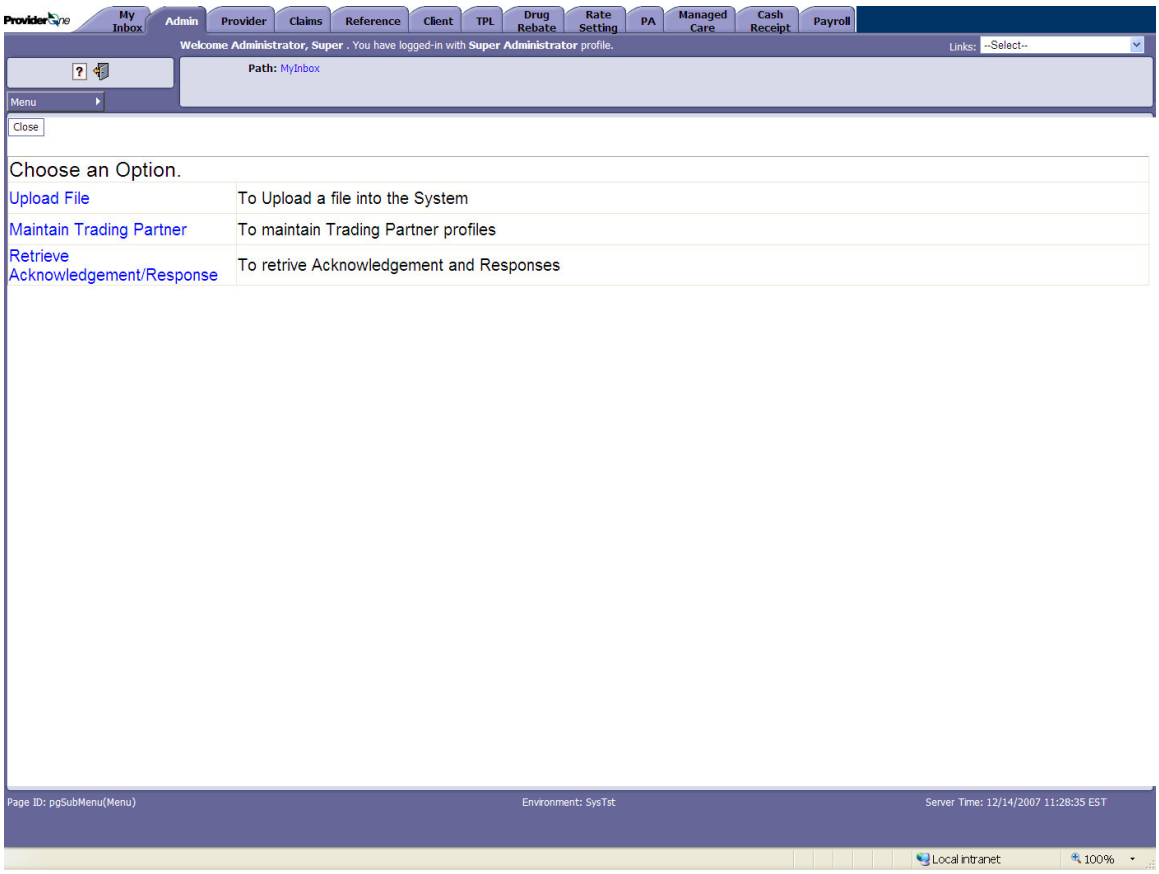
2.2 Retrieve batches via Web Interface

Once logged into the ProviderOne Portal, select the Admin Tab and the following options will be presented to the user:

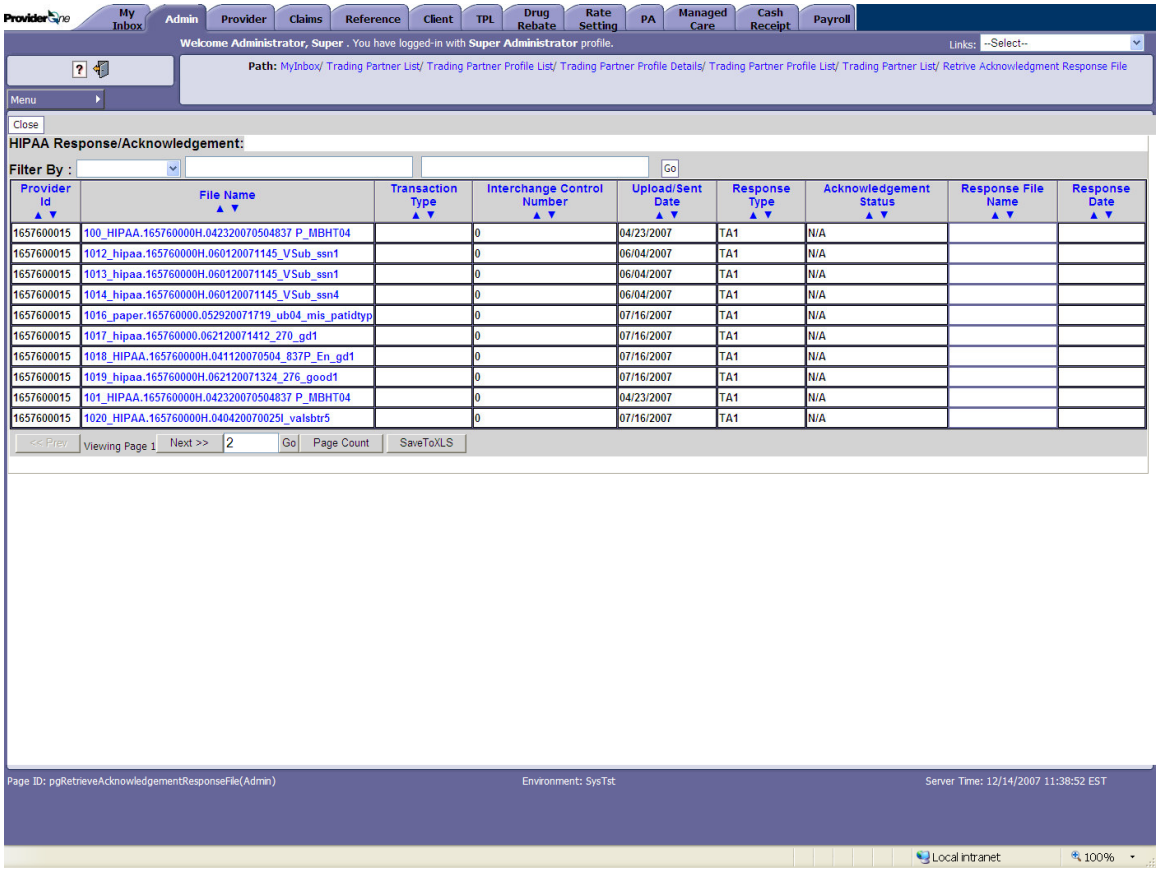


Click on the HIPAA option to manage the HIPAA transactions.

In the HIPAA Transaction Management screen, the user can Upload file and Retrieve Acknowledgement/Response as shown below:



Select Retrieve Acknowledgement/Response option from the HIPAA screen to retrieve Acknowledgements/Responses (TA1, 997, 271, 277, 820, 834, 835, or 277U) as shown below:



2.3 Set-up, Directory, and File Naming Convention

2.3.1 SFTP Set-up

Trading partners can contact 1-800-562-3022 for information on establishing connections through the FTP server. Upon completion of set-up, they will receive additional instructions on FTP usage.

2.3.2 SFTP Directory Naming Convention

There would be two categories of folders under Trading Partner's SFPT folders:

1. **TEST – Trading Partners should submit and receive their test files under this root folder**
2. **PROD – Trading Partners should submit and receive their production files under this root folder**

Following folder will be available under TEST/PROD folder within SFTP root of the Trading Partner:

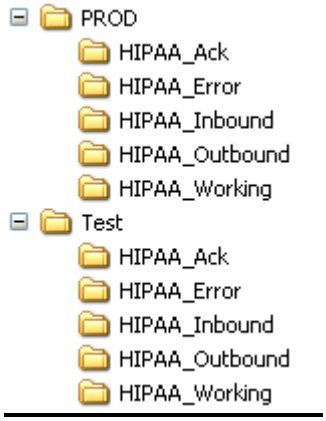
'HIPAA_Inbound' - This folder should be used to drop the Inbound files that needs to be submitted to DSHS

'HIPAA_Ack' - Trading partner should look for acknowledgements to the files submitted in this folder. TA1, 997 and custom error report will be available for all the files submitted by the Trading Partner

'HIPAA_Outbound' – X12 outbound transactions generated by DSHS will be available in this folder

'HIPAA_Error' – Any inbound file that is not HIPAA compliant or is not recognized by ProviderOne will be moved to this folder

Folder structure will appear as:



2.3.3 File Naming Convention

The HIPAA Subsystem Package is responsible for assisting ProviderOne activities related to Electronic Transfer and processing of Health Care and Health Encounter Data, with a few exceptions or limitations.

HIPAA files are named:

For Outbound transactions:

HIPAA.<TPId>.<datetimestamp>.<TxID>.O.<out>

Example of file name: HIPAA.16576000000000.122620072113l5.835.O.out

- <TPId> is the Trading Partner Id
- <datetimestamp> is the Date timestamp
- <TxID> is the Transaction Id.

2.4 Transaction Standards

2.4.1 General Information

HIPAA standards are specified in the Implementation Guide for each mandated transaction and modified by authorized Addenda. Currently, the 835 transaction has one Addendum. This Addendum has been adopted as final and is incorporated into DSHS requirements.

An overview of requirements specific to each transaction can be found in the 835 Implementation Guide. Implementation Guides contain information related to:

- Format and content of interchanges and functional groups
- Format and content of the header, detailer and trailer segments specific to the transaction
- Code sets and values authorized for use in the transaction
- Allowed exceptions to specific transaction requirements

Transmission sizes are limited based on two factors:

- Number of Segments/Records allowed by HIPAA standards
- DSHS file transfer limitations

HIPAA standards for the maximum file size of each transaction set are specified in the 835 Implementation Guide. The 835 Implementation Guide recommends a limit of 10,000 CLP Claim Payment Segments in 2100 Claim Payment Information Loop. ProviderOne may exceed the recommended limit of 10,000 CLP (Claim Payment Information) segments per ST-SE envelope in order to maintain the balancing requirement within 835.

DSHS has no size limitations for postings to its FTP Server.

2.4.2 Data Format

Delimiters

The ProviderOne will use the following delimiters on outbound transactions:

- Data element separator, Asterisk, (*)
- Sub-element Separator, Vertical Bar, (:)
- Segment Terminator, Tilde, (~)

Dates

The following rules apply to any dates in the 835 transaction:

- For the 835 transaction, all dates will be formatted according to Year 2000 compliance, CCYYMMDD, except for the ISA09 element where the date format is YYMMDD.

- The only value acceptable for "CC" (century) is 20. The exception to this rule is for any of the Date of Birth values.

- Time is in military time format, 1 to 24 to indicate hours and 00 to 59 to indicate minutes and/or seconds. ISA10 and GS05 elements are formatted HHMM (ie 2115 defines the time of 9:15 p.m).

- No spaces or character delimiters should be used in presenting dates or times.

- Dates that are logically invalid (e.g. 20071301) are rejected.

Field Length

HIPAA regulations specify field lengths for all of the data elements of the 835 Health Care Claim Payment/Advice transaction. For some of these data elements, ProviderOne processes fewer characters than the maximum allowed. The Transaction Specifications in section 3 display the ProviderOne field lengths.

Phone Numbers

Phone numbers are presented as contiguous number strings, without dashes or parenthesis markers. For example, the phone number (800) 555-1212 should be presented as 8005551212. Area codes should always be included.

2.4.3 Data Interchange Conventions

When transmitting 835 Transactions to Trading Partners DSHS follows standards developed by the Accredited Standards Committee (ASC) of the American National Standards Institute (ANSI). These standards involve Interchange (ISA/IEA) and Functional Group (GS/GE) Segments or “outer envelopes”. All 835 Transactions are enclosed in transmission level ISA/IEA envelopes and, within transmissions, functional group level GS/GE envelopes. The segments and data elements used in outer envelopes are documented in Appendix B1 of the 835 Implementation Guide. Specific information on how individual data elements are populated by DSHS on ISA/IEA and GS/GE envelopes are shown in the table beginning later in this section.

The ISA/IEA Interchange Envelope, unlike most ASC X12 data structures has fixed field length. The entire data length of the data element should be considered and padded with spaces if the data element length is less than the field length.

Example of ISA with the entire data length with padded spaces:

ISA*00* *00* *ZZ*123456789 *ZZ*77045
*040303*1300*U*00401*000001001*1*T*:~

DSHS transmits 835 Transaction files with a single ISA/IEA and GS/GE envelope. 835 Transaction contains all the claims within one ST-SE segment within the same GS/GE envelope.

2.4.4 Acknowledgement Procedures

N/A

2.4.5 Rejected Transmissions and Transactions

DSHS will validate all 835 transactions up to HIPAA validation levels 1 and 2. If a receiver that rejects any part of a transmission, they must reject the entire transmission. Data on rejected 835 transmissions should not be used to update Trading Partner databases. DSHS transmits 835 Transactions within single functional groups, and in single ST-SE Segments.

3 Transaction Specifications

Page	Loop	Segment	Data Element	Element Name	Comments
Interchange Control Header					
App B	Envelope	ISA	01	Authorization Information Qualifier	Receive 00
App B	Envelope	ISA	02	Authorization Information	Receive 10 Spaces
App B	Envelope	ISA	03	Security Information Qualifier	Receive 00
App B	Envelope	ISA	04	Security Information	Receive 10 Spaces
App B	Envelope	ISA	05	Interchange ID Qualifier	Receive ZZ
App B	Envelope	ISA	06	Interchange Sender ID	Receive 77045 followed by 10 Spaces
App B	Envelope	ISA	07	Interchange ID Qualifier	Receive ZZ
App B	Envelope	ISA	08	Interchange Receiver ID	Receive the 9 Digit ProviderOne ID followed by 6 Spaces
App B	Envelope	ISA	09	Interchange Date	Receive System Date Format - YYMMDD
